

## **HNR 10th Anniversary Symposium Re-run, March 2009**

HNR 10th Anniversary Symposium re-run - 10 years of conducting research in nutrition and your health.

In December 2008 MRC Human Nutrition Research celebrated its 10th anniversary and held a symposium followed by the Annual Elsie Widdowson Lecture given by David Fraser, Professor of Animal Science at the University Sydney (previously at the MRC Dunn Nutrition Unit, Cambridge), a world authority on vitamin D in health and disease.

The event was very successful and we were oversubscribed. We decided to run it again on the 17th March 2009 and were again successful in having a full attendance. The Symposium was followed by the 2009 Elsie Widdowson Lecture given by Professor Alan Jackson, Director of the Institute of Human Nutrition, Developmental Origins of Health and Disease Division, University of Southampton.
